

Special Services for Religious Organizations and Non-Profits

North Florida Payroll Services understands that Churches, Religious Organizations and Non-Profit Organizations have unique needs for their payroll. Churches have to manage Clergy taxable and non-taxable earnings and all non-profits need payroll allocation to proper departments. In some cases, payroll reporting for grants is a key component.

When you enroll with our payroll service, our unique and simple conversion process will help you set up your payroll properly from day 1. We will manage your payroll reporting as well as your tax filings. You will never again worry about making a tax payment on time.

Our online payroll application will allow you to enter your data from your desk and allocate earnings directly to the proper department.

Employees can use our NFPS Timeweb to log their time online (subject to administrative approval) which enables you to manage employees without the use of a time clock.

Finally, we provide you with ample customizable fields to log important HR information for each employee so that you are sure to remain in compliance with all regulatory requirements (such as OSHA, Family Medical Leave, Workers Compensation, disciplinary situations, and more).

Our goal is to be an asset to your organization—your time is valuable and should not be spent on payroll details. Leave the details to us and go about your business!
